Business Plan & Profit Report

Ad results, prices, profit per order, stock and the road to ৳1–3 lakh profit a month · 22 October 2026

৳1,124	101	8	৳21,936
Ad spend, 18–21 Oct	Call taps from ads	Real orders	Expected monthly profit at ৳1,000/day

Summary

- In 4 days on a brand-new page, our ads brought **101 call taps** and **8 real orders**.
- Cost per call dropped **53%**, from ৳16.7 on day 1 to about ৳8 on days 3–4.
- Each order costs about **৳162** in ads (VAT included). A 3-bottle order still leaves **৳296** profit after that.
- New offer: 1 bottle ৳250 + delivery · 2 bottles ৳550 · 3 bottles ৳899 (free delivery).
- At ৳1,000/day in ads: about **213 orders**, **৳96,208 sales** and **৳21,936 profit** a month.
- Target: **৳1 lakh profit/month by month 3**, **৳3 lakh by month 6**.

1 Why our ads are winning

৳1,292	৳11.1	৳8.6	৳162
Total spend with VAT	Average cost per call	ad1 cost per call	Ad cost per order

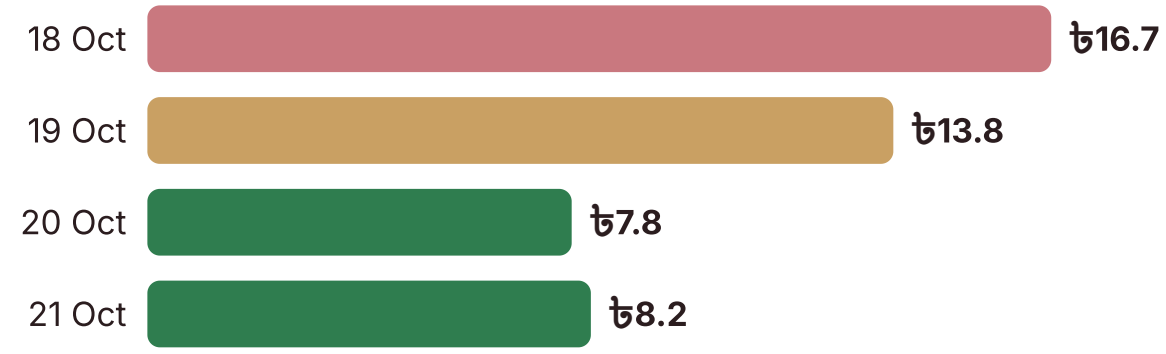

Getting cheaper every day
Cost per call fell from ৳16.7 to about ৳8. Facebook is finding the right buyers.

We have a clear winner
ad1 brings a call for ৳8.6, half the cost of ad2. Facebook now puts almost all the money on it.

Calls, not clicks
The ad has a "Call now" button. Buyers talk to us directly, which builds trust for a private product.

Big room for profit
We pay about ৳162 in ads per order. We only start losing money above ~৳265 per order.

Cost per call, by day

ad1 vs ad2

Ad	Spent	Call taps	Cost per call
ad1 (selfie video)	৳576	67	**৳8.6**
ad2 (selfie video)	৳548	34	৳16.1

Who sees the ads: all of Bangladesh, men and women aged 25–65+. On day 1, 96% of results came from men aged 25–54. "Call taps" are counted by Facebook; real connected calls are a bit fewer.

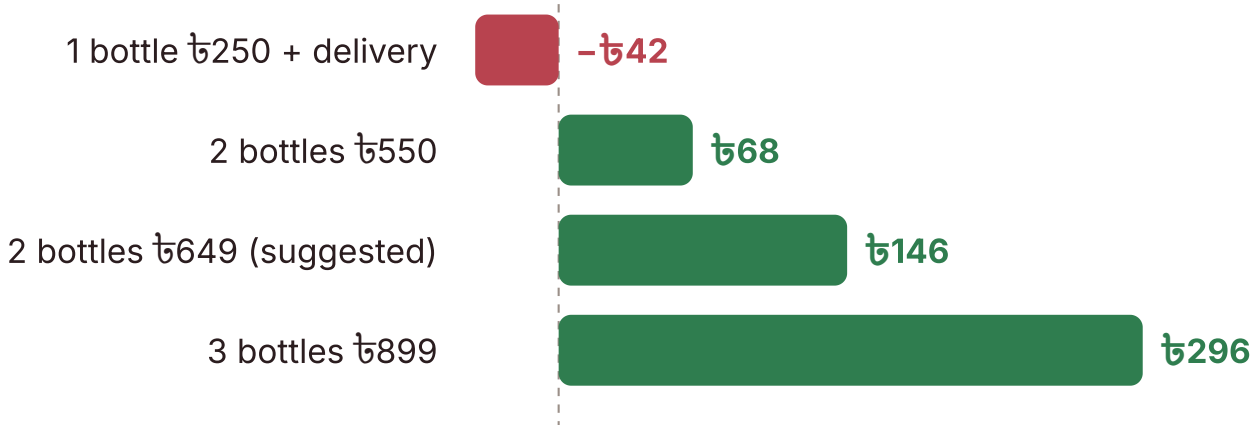

2 Product prices — old vs new offer

Offer	Old price	New price	Customer pays	Per bottle
1 bottle	৳600	**৳250** + delivery	৳350	৳350
2 bottles	—	**৳550** · free delivery	৳550	৳275
3 bottles	৳1,200	**৳899** · free delivery	৳899	৳300

Suggestion: make 2 bottles **৳649**. Then the price per bottle drops at each step (৳350 → ৳325 → ৳300), so more buyers choose 3 bottles, our most profitable order. Today 3 bottles (৳300 each) cost more per bottle than 2 (৳275 each).

Prices are only given on the phone, never in posts or ads.

3 Profit per order

Offer	Profit if delivered	Margin	Average kept (after returns)	Profit after ads
1 bottle ৳250 + delivery	৳176	71%	৳119	**−৳42**
2 bottles ৳550	৳314	57%	৳230	**৳68**
2 bottles ৳649 (suggested)	৳413	64%	৳308	**৳146**
3 bottles ৳899	৳600	67%	৳458	**৳296**

"Profit if delivered" = price minus bottles (৳60 each), courier, packaging and COD fee. "Average kept" also counts 1 in 5 parcels coming back. "Profit after ads" also takes away ৳162 ad cost per order. The 1-bottle offer brings calls; the profit is in 2 and 3 bottles.

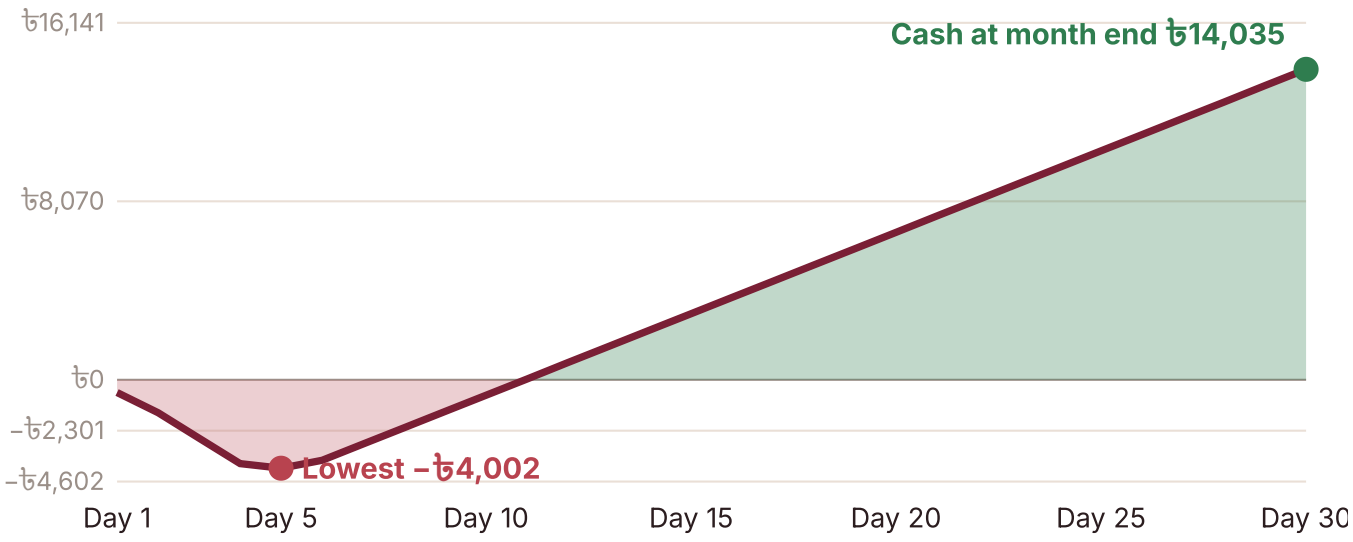

4 One month at ৳1,000/day in ads

Ad cost for 30 days: ৳30,000 + 15% VAT = **৳34,500**.

Case	Ad cost per order	Orders/day	Orders/month	Bottles	Sales (delivered)	Profit/month
Good	৳130	8.8	265	425	৳119,890	**৳35,828**
Expected (today's cost)	৳162	7.1	213	341	৳96,208	**৳21,936**
Bad	৳200	5.8	172	276	৳77,929	**৳11,213**

> Expected: about **213 orders**, **341 bottles** and **৳21,936 profit** in the month, after every cost (bottles, courier, packaging, returns, ads and VAT).

Cash in hand over the month (ramp ৳500 → ৳800 → ৳1,000/day)

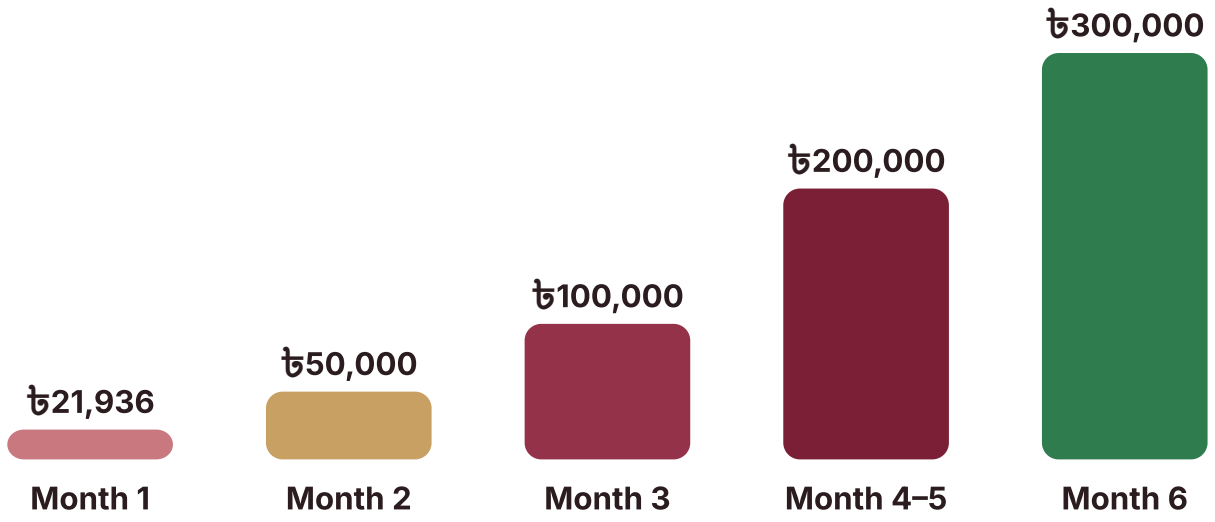

Ads are paid on the same day, courier money comes about 4 days later. So cash dips to about −৳4,002 first, is back to zero around day 11, then grows about ৳737 a day. The ads pay for themselves from sales after that — about ৳4,002 is needed once to start, taken from the first orders' courier money.

5 Stock

Orders per day	Bottles per day (avg 2/order)	100 bottles last
3	6	17 days
5	10	10 days
8	16	6 days
10	20	5 days
15	30	3 days

We have **50 bottles** now. At ৳1,000/day we use about 14 bottles a day, so stock lasts 3–4 days. We need **100 more bottles (about ৳6,000)** by day 3, and always 2 weeks of stock in hand after that.

6 Roadmap — ৳1 lakh to ৳3 lakh profit a month

Stage	Profit/month	Orders/day	Ads/day (before VAT)	Bottles/month	Sales/month
Month 1	**৳21,936**	7	৳1,000	341	৳96,208
Month 2	**৳50,000**	11	৳1,634	570	৳172,208
Month 3	**৳100,000**	18	৳2,841	1,002	৳302,407
Month 4–5	**৳200,000**	38	৳6,343	2,119	৳639,645
Month 6	**৳300,000**	61	৳10,627	3,373	৳1,018,098

Stage	What it takes
Month 1	৳1,000/day ads. 2 bottles at ৳649. 8–15 new videos in the ad1 style.
Month 2	40% of orders as 3 bottles. Next-day payment from the courier.
Month 3 · ৳1 lakh	Buy 1,000+ bottles at once to get ৳50 per bottle. Half of orders as 3 bottles. 1 extra person on calls.
Month 4–5 · ৳2 lakh	2–3 people on calls, orders on WhatsApp and Messenger too. Launch a 2nd product.
Month 6 · ৳3 lakh	2–3 products, 3–4 callers, better courier rates.

These are targets, not promises. We move to the next stage only when the numbers hold. Ad cost per order is expected to rise from ৳162 to about ৳200 as we spend more — that is already counted.

Numbers we assumed

- Bottle ৳60 (৳50 from month 3) · courier ৳100 (paid even on returns) · packaging ৳10 · COD fee 1% · VAT 15% on ads.
- 1 in 5 parcels returned (20%) — a common figure for cash on delivery in Bangladesh; we will replace it with our own number.
- Order mix: 30% 1 bottle, 40% 2 bottles, 30% 3 bottles (20/30/50 from month 3). The 1-bottle buyer pays about ৳100 delivery.
- Ad results are real (Meta Ads Manager, 18–21 Oct 2026). Order count: 8 real orders.
